## Basic Low Voltage Electricity for Installers, New and Improved - ADAMS RITE/HES/SECURITRON

EZ# 990982 .....8:00AM - 12:00PM

Course length: 4 hours Instructor: Rodger Schmidt

Class size limit: 20 students

Credits offered: ALOA #AATP-AA007 ESA #13-3838.4 credits

Attendees: Locksmiths, Installers, Access Control technicians

Content balance: 40% instructional - 60% hands-on learning

Course Description:

This entry level course is designed to educate the participants in the basic electronic knowledge needed to wire an electronic locking system. The class includes a balance of instructional and hands-on exercises. The following subjects are covered:

- Key Figures in Electricity
- Voltage, Current and Resistance
- AC & DC Electricity
- Switches and Relays
- Normally Open / Normally Closed Circuits
- Fail Safe/Fail Secure lock wiring
- Hands-on basic system wiring and operation
- Series versus Parallel Wiring
- Use of Multi-meters - How to test
- Multi-meter Circuit Testing for Volts & Amps
- Electronic Components

## CO & Engage Technology - ALLEGION

EZ# 064708 .....8:00AM - 12:00PM

Installation & Service training on the Schlage CO200 for Multi-Family and Commercial applications.

Participants will receive training on:

- Installation of the Schlage Express Software onto a computer
- Installation of the CO200 onto a mount
- Programming of the software with the lock.

All participants are required to bring a laptop with administrative rights. They will receive: a copy of Schlage Express Software to download, a CO200 lock, and a mount (**Over a \$1,000.00 retail value!**). HDD's (hand held device) will be available for use.

Schlage's Engage product portfolio will also be covered, introducing the Schlage NDE, LE, and Control with the free Engage application. Please pre-enroll an Engage account as well as download the free app onto your smartphone or tablet. The Engage WebPortal can be found at: Portal.AllegionEngage.com.

*Seminar Cost: \$100.00 (Up to two persons per shop ONLY; ONE Lock Package per Shop)*

## Door Installation (Split Class - six hours total) - RICK & TIM

EZ# 990403 .....8:00AM - 12:00PM at Hotel,  
1:00PM - 3:00PM at Cleveland Branch

Instructors: Rick Bausone and Tim Brown

Rick and Tim, who have been in the door installation business for over 60 years, bring their expertise to you, along with Daybar Doors. This continues to be one of our most popular classes. Topics include installation and repair of hollow metal and wood doors and frames, as well as overall information on types of wood and hollow metal doors and frames, simple repairs, and info on fasteners and caulking. Fire and life safety codes will be covered. Tool lists and other information will be provided and you'll

## Door Installation - continued

have extra time for questions and answers. Then after lunch, we head over to the IDN Cleveland branch to tear out their rusted frame and replace it! Whether you're new or experienced in doors, this class will aid in your proficiency and help grow your business.

## Mechanical Safe Lock Diagnosis/Repair - SETH BLUMBERG

EZ# 061436 .....8:00AM - 5:00PM

Stop turning down safe service calls and begin earning money immediately by doing safe work. Add the very profitable specialty of professional safe servicing to your full-service locksmith's offerings by building your confidence and ability. You will learn to recognize your limitations so you can make informed decisions regarding what safe work you can do and what work you should refer to a more experienced safe technician. Most safe lockout service calls can be solved by using logical dialing techniques without the need to penetrate the container. The class will cover terminology, identification, combination changing, dialing diagnostics, and opening procedures such as manipulation, drilling, change keyhole scoping, etc. Students will learn what technical information and tools are available so that you can make an informed decision about what tools to add and in what order. Learn about professional organizations for safe technicians and the networking possibilities that they provide. You will learn how to obtain GSA container work and how to access the DOD hotline, provided free to locksmiths by the DOD. Approved for 1 point towards the ALOA PRP recertification requirements.

*Seminar Cost: \$125.00 Class Limit: 20 students*

## School Security: Classroom Door Locking Solutions - BEST ACCESS SOLUTIONS

EZ# 990799 .....9:00AM - 12:00PM

There is an ever growing public concern for the safety of our schools. As a result, there are many products coming into the marketplace that do not meet the already established code requirements. In this presentation, we will take a look at what is available for security purposes that is code compliant and the concerns regarding those solutions that are not. The new BEST SHELTER lock system (wireless responsive lockdown solution) will also be introduced and discussed. This is one of the best electronic solutions to keeping buildings, schools, and businesses safe in these dangerous times.

## How to Keep Your Door Hardware Code Compliant - BEST ACCESS SOLUTIONS

EZ# 990446 .....1:00PM - 4:00PM

In this class you come to understand the Architectural Hardware Consultants process in creating a code compliant Door Hardware Specification 08 71 00. Learn to identify available industry resources, codes and standards that affect door hardware and recognize what opening component are required to comply with these codes. We will cover Fire, Life Safety and ADA codes. This program will help both the novice and veteran to select the correct, code-approved product for the most commonly mis-applied applications.

## Advanced Electronic System Wiring and Basic Troubleshooting - ADAMS RITE/HES/SECURITRON

EZ# 990421 .....1:00PM - 5:00PM

Course length: 4 hours Instructor: Rodger Schmidt  
Class size limit: 20 students

Credits offered: ALOA #AATP-AA007 ESA #13-3837  
Attendees: Locksmiths, Installers, Access Control technicians  
Content balance: 40% instructional - 60% hands-on learning  
Prerequisites: Basic Low Voltage Electricity for Installers  
Course Description:

This course is designed for participants with previous basic **Advanced Electronic System - continued** electronic knowledge and use of a multimeter. Covered in this course are advanced access control and system wiring techniques, installation and product troubleshooting. The class includes instructional and hands-on exercises covering the following subjects:

- Creating Wiring Diagrams
- Fire Alarm Interface
- Fail safe lock system wiring
- Fail secure lock system wiring
- Basic system troubleshooting-Using multi-meter
- Wiring trouble shooting - What you should test
- DK-26 and Power Supply Trouble shooting
- Magnetic lock and electric strike troubleshooting
- Touch sense bar troubleshooting
- Digital keypad troubleshooting
- Basic access control systems troubleshooting

#### **Mul-T-Lock Certification CLASSIC PRO - MUL-T-LOCK**

EZ# **066097** .....**1:00PM - 5:00PM**

A seminar with a \$450.00 value! Learn about Mul-T-Lock's new patented platform, get a complete product overview and learn how to work with Mul-T-Lock products. Each paying attendee will receive:

- Mini Pinning Kit
- Classic Pro Rimo
- Two Junior Cylinders
- A card with two keys.
- Pinning Mat
- Tweezers.
- T-Shirt
- Screwdriver.

*Attendee will be entered into a drawing to win a FREE prize.*

## **FRIDAY, March 16th, 2018**

#### **Low Energy Operator, Exit Devices and Exit Alarms - DETEX**

EZ# **064706** .....**8:00AM - 10:00AM**

Instructor: Scott Peck, Sales/Engineer. Detex Corporation  
This informative course will cover:

- When and where to specify
- Understanding requirements of the application
- What will be needed for the designated installation location; Recognition of possible installation problems and what will be needed to overcome these problems
- Programming and operation of the Detex Low Energy Operator
- The installation and usage of all other support equipment that may be required such as electrified panic hardware, wireless push button, etc.
- Overview of all Detex products

#### **SFIC with Hands-On Pinning - JEROME ANDREWS**

EZ# **990746** .....**8:00AM - 12:00PM**

Class will cover small format core construction, key cutting methods, selecting top masters and controls, writing and using an A2 system biting list, and physical core pinning. Upon completion, students will be able to read cut keys, decode a

pinned core, and pin a core using keys from the biting list they wrote. A3 and A4 increment systems, and destructive and non-destructive core extraction techniques will be discussed, as well as master keying at the control shear line. The characteristics of various large format cores will be reviewed, including, CorbinRusswin, Medeco, Sargent, Schlage and Yale.

**SFIC with Hands On Pinning - continued**  
**IMPORTANT! Students should bring a plastic mallet, tweezers and key micrometer.**

#### **Level 4 Access Control Design & Configuration HANDS ON - ADAMS RITE/HES/SECURITRON**

EZ# **990419** .....**8:00AM - 12:00PM**

This **BRAND NEW** class is an advanced class with approximately 3 hours of hands-on training which will require knowledge of low voltage electrical circuits, testing with multimeter and basic circuit design. The class will consist of working as a team to develop, draw and build operational access control circuits. Goal – each team will build 3 operational access control circuits. Each class will have 4 working scenarios.

Skills to have or develop during this class:

- Understanding customer needs – how the door should function
- Creating operational door narrative
- Creating the wiring diagram – drawing as a team
- Building the circuit and programming the system
- Troubleshooting – system for proper operations
- Testing and turnover of system

*Class is in the design process but will be completed and submitted for ALOA CEU's. Class size limited to 20 students*

#### **Basic Safe Manipulation- SETH BLUMBERG**

EZ# **066098** .....**8:00AM - 5:00PM**

Manipulation is the art of opening combination locks without prior knowledge or information about the present combination. It does not require the use of force or tools, does not cause damage to any part or component, and leaves no evidence of entry. Each student will learn when to manipulate and will understand how picking, reading, and impressioning are related to safe manipulation. The class will also cover proper combination lock terminology. The student will become competent in dialing diagnostics and visualization of the internal workings of a combination lock. Students will understand the principles of manipulation, become familiar with manipulation aids, and gain confidence in manipulation. Approved for 1 point towards the ALOA PRP recertification requirements.

*Seminar Cost: \$125.00 Class Limit: 20 students*

*Seminar Cost: \$125.00 Class Limit: 20 students*

#### **Entrematic Low Energy Door Operator - DITEC**

EZ# **990029** .....**10:00AM - 12:00PM**

Learn how to install the HA-8 Ditec/Hunter operator. You will get a direct comparison to several competitors of this durable, versatile feature driven value-priced operator. Get the ins & outs on how to determine mounting the Back Plate/Header, Hanging, Arm Placement, Powering Up, Control Board, Reed Switches (Back Check/Latch Check) and Activations. Learn how to install the HA-8. See how this operator can build your Profitability, who to prospect, where to bid, how to sell and close. If you sell or service low energy door operators or want to, this class is for you.

**Electric Strike Installation -**  
*ADAMS RITE/HES/SECURITRON*

EZ# **990034** .....**1:00PM - 5:00PM**

Course length/Instructor: 4 hours/Rodger Schmidt

Class size limit: 20 students

Credits offered: ALOA #AATP-AA011

ESA #13-3839.2 credits

Attendees: Locksmiths, Installers, Access Control technicians

Content balance: 30% instructional - 70% hands-on learning

Course Description: Students will be shown the easiest techniques for cutting and installing an electric strike into a hollow metal door frame. Cutting tool selection and use of the HES metal template kit is demonstrated. Students will be allowed to individually measure and cut in a strike. With instructional and hands-on exercises covering the following subjects:

- Codes and Standards
- Fire Rated verses non-fire rated Openings
- Electric strike application and selection
- Frame and door types
- Fail safe to fail secure conversion of HES strikes
- 12 to 24 volt strike conversion
- Solenoid testing and Trouble Shooting
- Installation techniques
- Safety
- Hands on installation of electric strikes

**Trilogy Lock Installation, Repair and Programming -**  
*ALARM LOCK*

EZ# **990039** .....**1:00PM - 5:00PM**

Class Length: 4 hours

Instructor: Andy Phelps - National Training Manager

This class is designed for the beginner or experienced technician and will cover the proper installation technique along with some tips/tricks for an easier installation. Also covered will be how to repair the Alarm Lock Trilogy mortise and cylindrical locks. We will discuss what parts are replaceable and how to correctly remove and replace those parts. The instructor will also share some tips on how to make the repair process easier. The student will also learn basic keypad programming commands associated with the T2 and T3 Trilogy locks as well as some of the more complex commands of the T3 locks.

**Electro-Mechanical Solutions -**  
*COMMAND ACCESS*

EZ# **990037** .....**2:00PM - 4:00PM**

Students will learn the electrified options for mortise and cylindrical locks, add switches and low power emitting devices for fail safe locks. Learn how to field-install exit device latch pullback kits for several manufacturers. Learn how to leverage existing hardware giving you the edge on the competition and electrify openings with: electronic transfer hinges and loops, latch pullback exit device, connect loads to power supplies, use an electric meter and Molex solutions. Instructors will teach how to transform existing mechanical hardware openings to an access control opening on the door. Gain the edge on your competition with electronic transfer hinges and loops, exit device e-trim, connect loads to power supplies, build circuits, and Molex solutions.

**IDN Locksmithing/Rock & Roll Jeopardy -**  
*JOE CONKEY*

EZ# **990008** .....**4:00PM - 5:00PM**

Joe Conkey returns as the host of our version of Jeopardy. We will give you the answers on 6 categories covering many aspects of our industry, such as door hardware, IDN, LSDA, codes, and locksmithing. And since we'll be in the Rock and Roll capital of Cleveland, you can count on being tested on your knowledge of rock/folk/blues, and especially songs and artists that makes Cleveland Rock! In addition to giving out prizes and coupons that can be used at our show on Saturday, we will keep score of your "dollars" earned, and the top 3 scores will face off in Final Jeopardy to win our top prizes. Don't miss this fun and educational 60 minutes!

**VIP HOSPITALITY NITE -**  
*2018 IDN-HARDWARE SALES TRADE SHOW*

EZ# **990417** .....**5:30PM - 8:00PM**

*Cocktails and hors d'oeuvres at the Impulse Lounge.*

## **SATURDAY, March 17th, 2018**

**How to Market Your Business -**  
*JOEY DALESSIO*

EZ# **064710** .....**7:30AM - 9:30AM**

If you are asking yourself how to market your business, this class is for you. What works? How much will it cost? What measures will show me it actually works? How will I compete against the big box retailers? Is competing with the Internet sellers possible? What do I do to market my business if I'm just a mobile operator? Want to be inspired to take action? Sometimes a catalyst is what makes the difference. Let this class be your catalyst to a better business for you. Joey Dalessio is an accomplished locksmith, sales, marketing and business development professional, with experience in his family's locksmith shop to positions with global manufacturers and distributors. Joey has taught business classes for many years and guarantees that "you won't fall asleep - you will remember this class."

**2018 Automotive Update -**  
*STRATTEC*

EZ# **990100** .....**7:30AM - 9:30AM**

Instructor: Jeff Baker

Class will bring you up to date on vehicle platforms that STRATTEC services including GM and Ford. There will be limited hands on pinning of 2 select GM or Ford side mill ignitions and door locks. Technology changes regarding locks and keys will be covered including current trends and future applications. You will also be updated specifically on what is serviced by STRATTEC for the 2018 model year vehicles. STRATTEC online resources will also be covered.

## **29th Annual Dealer Trade Show & Security Conference**

EZ# **990865** .....**9:30AM - 3:00PM**

# IDN 2018 Show Registration - March 15-17

## \$8900

**SINGLE Person Class Rate** EZ# 990460  
Attend as many classes as you want during the 3-day show event for ONE LOW PRICE.

## \$14900
